

Super Earth

© 2011 jim ocean (Thank You Kepler!)

Hey everybody have you heard?
Someday we're gonna have to leave this Earth
I mean this rock in space my friend
If we're lucky to survive by then
When everything up to Mars
Will be melted like a snickers bar
We'll have to find a place to run
And wave goodbye to that Big Red Sun

Time to take a look around in the neighborhood
Find a place to start again
Pack your bags we're going someplace better
with our friends
Oh...Super!
Super Earth...
Super!
Super Earth (repeat whole chorus)

We'll travel far into the void
Like Christopher Columbus on steroids
We'll find a star with stellar weather
A little diamond that'll last forever
Our new home will blow your mind
There'll be 27 moons and fourteen rings to shine
Bigger waves and bigger surf
Imagine surfin' on a Super Earth!

Time to take a look around in the neighborhood
The grass 'll be much weirder there
Pack your bags it's time to breathe
another planet's air
Oh...Super!
Super Earth...
Super!
Super -Earth (repeat whole chorus)

So, hey everybody it's our fate
If we survive we'll have to migrate
You can watch the 'the show' from Mars
But I'll be leavin' to go to the stars

I'll take my chances out in space
Another story for the human race
We'll find a place for pure adventure
Just like the Earth only...better!

Time to take a look around in the neighborhood
The Earth'll be just a relic
Pack your board we're going someplace really
psychedelic
Oh...Super!
Super Earth...
Super!
Super Earth... (repeat chorus)

10, 9, 8,7,6,5,4,3,2,1...
Blast Off!!! Oh Super Earth!!!
